

# Scott Pribe

I am a passionate, hard-working, and results-driven Front End Developer looking to obtain an opportunity to grow my skills professionally. I started learning to code in 2020 to learn a new skill during quarantine, and since then I have been obsessed with building applications and improving my skills as a developer. I have extensive experience working with HTML, CSS, Javascript, and React through various personal projects I have built from scratch. I am open to learning new technologies and am not afraid to step out of my comfort zone. Even though the majority of my experience has been building projects on my own, I am a team player and thrive working in an environment with multiple people.

## Web Development Experience

### Shopping Cart App ([view here](#))

- Created reusable components that streamlined the application.
- Applied responsive design for all devices and implemented standard UI/UX principles.
- Developed an eCommerce website that imitates the Taylormade Golf website with HTML, CSS, and React for the front end and Firebase for the back end.

### Restaurant Landing Page ([view here](#))

- Developed and designed a landing page for a local restaurant using HTML, SASS/SCSS, React, and React Router.
- Implemented responsive design and UI/UX principles so all users are able to have the same experience on any device.
- Improved the website's Lighthouse report performance in SEO by 20%, Accessibility by 35%, and Best Practices by 29%.

### To-do App w/Firebase ([view here](#))

- Implemented asynchronous functions to retrieve and display data from the Firebase NOSQL database.
- Applied Firebase user authentication services so users are able to access their information on any device while providing security to their account.
- Developed a productivity application with HTML, CSS, React, Styled Components and Firebase for personal and professional use to increase organization and ability to hit deadlines in a timely fashion.

### Weather App ([view here](#))

- Utilized local storage to store and display user's favorite cities.
- Implemented light and dark theme modes utilizing styled components.
- Created a weather app with HTML, CSS, and React by integrating a 3rd party API that displays requested information in a visually-pleasing and informative manner.

## SKILLS

HTML  
CSS  
Javascript  
React  
React Router  
SCSS/SASS  
Styled Components  
Firebase  
NPM  
Git  
Github

## Education

The University of Toledo,  
Toledo, OH

Bachelor of Business  
Administration, May  
2019

AACSB Accredited  
College of Business  
Administration

Major: Operations and  
Supply Chain  
Management

Minor: Information  
Systems

Overall GPA 3.76

## Professional Experience

### **First Solar** - *Global Logistics Analyst*

June 2019 to Present

- Develop and present solutions that deliver cost savings, improve processes and delivery performance.
- Align with leadership teams to understand AOP cost requirements and develop action plans to meet goals.
- Develop and implement KPI measures to monitor and benchmark suppliers to drive continuous improvement.
- Partner with global demand/supply planning and inventory management teams to ensure project site delivery contracts are fully met.

### **Dana Incorporated** - *Purchasing Co-Op*

December 2018 to May 2019

- Aligned with Senior Buyers to understand supplier KPI targets and discuss performance improvement opportunities.
- Identified and implemented cost savings opportunities while measuring actual vs planned savings within the electronics department.
- Identified and developed supplier relationships to expand the electronics supply base and benchmark prices with current suppliers to provide cost savings solutions.

### **SD Bullion** - *Logistics and Inventory Intern*

September 2018 to December 2018

- Executed freight shipment savings by researching opportunities and reduced cost by 34%.
- Optimized and implemented new logistics standards regionally and internationally to create superior shipping efficiencies.
- Enhanced my ability to prioritize multiple projects and meet deadlines while engaging in customer service calls and live chats.

### **Dana Incorporated** - *Global Operations Intern*

May 2018 to August 2018

- Collaborated with cross-functional business teams to implement process reporting and analysis metrics.
- Provided volume and revenue forecast reports through Campfire database to efficiently run market trends scenarios.
- Coordinated with manufacturing facilities across the globe to ensure accurate process descriptions and capacity information.

**Hub Group - Highway Operations Intern**

May 2017 to May 2018

- Provided exceptional customer service and capacity solutions while managing multiple projects.
- Supported Account Managers with day-to-day operations to ensure customer service standards are met.
- Established strong customer relations to understand their capacity requirements and exceed customer expectations.
